

Whether your horses compete, or are simply your best companions, poor joint health can slow them down and diminish their quality of life. Myristol has been specially formulated as a broad-spectrum and effective supplement to support your horses' joint health. Myristol was developed by Gayle W. Trotter, veterinarian, joint health researcher, former professor at Colorado State University, and devoted animal enthusiast. Myristol is effective in horses that already suffer from joint-related issues, and should also be considered for prophylactic/preventive use in equine athletes that may not yet have developed joint disease issues.

Dr. Gayle W. Trotter DVM, MS
Diplomate ACVS

Dr. Trotter: Colorado State University 20 years, American College of Veterinary Surgeons (ACVS), American Association of Equine Practitioners (AAEP). Major clinical interests are equine lameness, orthopedic surgery, and problems of the foot. Chiropractic and osteopathic work have recently been added to his clinical practice.

While at CSU, Dr. Trotter's research interests were in the area of joint disease in horses, and he co-edited a textbook on that subject (McIlwraith CW, Trotter GW, eds. Joint Disease in the Horse. Philadelphia, WB Saunders Co, 1996. Ultimately, he developed a product that included a more broad-spectrum approach to prevention of 'sore joints', so that soft tissue inflammation was addressed...a 'stand alone' comprehensive joint health supplement... Myristol.
